18 POUNDS OF BLOOD

is the average quantity in a healthy adult, but it is the quality of the blood that determines our strength to resist sickness. With weak blood we find cold hands and chilly feet; in children an aversion to study, and in adults rheumatic tendencies.

In changing seasons get abundant fresh air and take a spoonful of Scott's Emulsion after meals, because Scott's Emulsion is a rich blood-food that will increase both quantity and quality of the blood while it warms the body and helps carry off the impurities.

When multindes of people are today taking Scott's Emulsion to avert
winter Sickness, and are giving it to
their children, it is careless to neglect
it benefits. Look out for substitutes.

LIME AGAINST TUBERCULOSIS

LIME AGAINST TUBERCULOSIS

In the May 25, 1912, Issue of the
Journal of the American Medical Association appeared this statement
concerning calcium (time) medication
in the treatment of tuberculosis:

"Under the systematic, continued
and persistent regime of calcium assimilarion, Van Gleson has seen a
number of his putients improve."

The sputium clears up of tubercle
haeilit, which finally disappear, and
the patients are discharged with
henied pulmonary tuberculosis."

Ethical journals seldom speak so
positively about a remedial agent, vet
this testimony colocides with that
from many consumptives who have
secured like results through the use
of Eckman's Alterative.

Since calcium is a constituent of
this remedy, its healing power may
be due to the way this element is so
cumbined with other valuable ingredients as to be castly assimilated.

Eckman's Alterative contains no
opiates, narcolles or habit-forming
drugs, so it is mafe to try. From your
druggist or direct.
